Sanjivani Launches to Bridge India's Healthcare Gap with AI-Powered Digital Platform

India, June 4, 2025 — In a major step toward digital healthcare transformation, **Sanjivani**, a comprehensive web and mobile-based healthtech platform, has officially launched to provide instant, affordable, and reliable healthcare access across India — with a strong focus on rural and underserved communities.

Sanjivani combines artificial intelligence, real-time doctor consultations, and integrated medicine delivery into one seamless platform. Users can consult certified doctors, check symptoms using an AI chatbot, book appointments, and securely manage digital health records — all through a multilingual and user-friendly interface.

"Sanjivani is designed to make healthcare accessible to every Indian, regardless of their location. It's more than an app — it's a healthcare revolution," said the Sanjivani Team.

Available on both Android and web platforms, the app supports emergency services, voice search, and regional languages. Built using React, Flutter, Node.js, and hosted on AWS, the platform ensures data privacy, scalability, and performance reliability.

Key Features

- 24/7 access to verified doctors (online/offline)
- AI chatbot for initial diagnosis
- Medicine ordering and doorstep delivery
- Digital storage of prescriptions and medical reports
- Emergency contact integration
- Multilingual interface and dark mode support

Market Outlook

India's digital health market is projected to exceed ₹88,000 crore by 2025. With rapid smartphone adoption across both urban and rural areas, Sanjivani is poised to become a key enabler in India's digital healthcare revolution.

Looking Ahead

The Sanjivani team aims to:

- Serve over 10 million users within the next three years
- Onboard 50,000 certified doctors
- Partner with pharmacies, insurance companies, and public health programs including Ayushman Bharat

"Our vision is a future where healthcare is not a privilege, but a digital right accessible at everyone's fingertips," the team added.

Availability

Sanjivani will be publicly available starting **August 2025** on www.sanjivani.com and across major app stores.

About Sanjivani

Sanjivani is a next-generation digital health platform developed to close India's healthcare access gap through technology and innovation. It offers AI-driven tools, remote consultations, and integrated healthcare services for individuals, clinics, and public health programs.
